SECRET**DRAFT**Description

This package provides five positions for imagery analysis of the following topics:

-- Worldwide energy developments (one position)

-- Third World military forces (two positions)

25X1

--

-- Clandestine collection and operations support (one position)

Benefits

Approval will permit imagery-based analysis of worldwide energy resources and related developments, i.e., alternative energy sources,

25X1

25X1

This intelligence is critical to NFAC assessments of worldwide energy programs and their impact upon the international economy. OIA will increase its analytical effort on military forces in the Third World, with particular emphasis on North Korea and Middle East and African countries. Intelligence derived from this increased effort will enable NFAC to better monitor force developments in these areas, and to better respond to military capabilities and activities in the growing number of crisis areas. The increase in imagery-based analysis
